The Late Accident at the Hipp

YORK HOSPITAL.

It will be recollected that about ten days ago a young somen, named Charlotte A. Gliffilan, was accidentally bursed at the Hippodrome, by the taking fire of her slothing, since which time she has been lingering in great agony, and died at the Hospital yesterday. The deceased was engaged at that establishment as one of the ballet girls, and appeared as Miss Taylor, that being her name prior to her marriage. She was twenty four years of age, and a native of New Yeek.

Ceroner Hilton was notified to hold an inquest on the

body, and the fellowing is the evidence taken and the verdict of the jury;—

Seth Howe, being swern, says—I reside in this city, and am one of the proprietors of the Hippodrome, the other proprietors are Mr Avery Smith: of this city, Wilman Howe, of North Salem, N. Y., Richards Sands, of this city, and Jared Crave, of Laurons, N. Y.; Charlotte A. Gilfillen, the deceased, was in our employ as ballet girl; a week ago last Friday night, she was performing in a piece called "Fetes at Versailles;" there is an underground passage leading from the Twenty third street side of the Hippodrome, about 100 feet long, termina ing at a scene representing a tree through which a person can pass out into the open arens within the building; I have nevel been through the place; Mr. Charlet Howe superinceded the construction of the passage, and Mr. George Smith directed the ballet girls to pass through it and to come out at the figure of a tree, above referred to; at the time of the accident, while the deceased was regularly performing in the play spoken of, and while passing through said passage, her dress caught fire, burning her brdy in a manner, which I have since learned, caused ber death.

George W. Smith, sworn, says—I reside at the

ugh said passage, her dress caught fire, ourning her in a manner, which I have since learned, caused leath.

orge W. Smith, sworn, says—I reside at the h American Motel, and have been employed a mowth as ballet marter at the diponet, or the evening spoken of, the deceased was pering in a piece called "Versailles," there is an undersad passage on the Tweaty-third street aide, about leet long, terminating or opening into the areas at a twhere there is a figure representing a tree; the age is about three and a balf feet wide and four and aff feet high; on that occasion the passage was sed with candles placed on the sides, about three from the floor; at the termination of the passage is a short ladder to enable the performers to get up the figure of the tree, there was a light behind the propose of preventing accidents; on the tree in question the decease! had on a sed dress; she proceeded through the passage, asme out into the areas with her clothes on fire; was employed under the name of Augusta Taylor, was there only five days previous to the accident; on night in question the canales were not protected; replaces are now supplied by lanterns; this is the only sent that has taken place in the passage, argaret hierry, otherwise Margaret Osborne, being mays—I relied in avenue B near Twelfth street; I been engaged at the Hippodrome one week previous time of the accident; I dauced in the ballet, I ed through the passage spukum of on the might in etone in company with, and immediately ahead of deceased; I had passed up the ladder, at the termination in company with, and immediately ahead of deceased on fire; he runder clothes were on fire, the value the part of her dress was first on fire, ahe stoped to the fire out, when the flames passed over her head;

phece was fini-bed, I think if the deceased had used sadinary care, the accident would not have happened; I can't conceive hose she could get her dress on fire from the candle urder the ladder. The deceased told me she did not have how it caught.

Dr. Perby, one of the physicians attached to the New York Respital, te-tifled to the deceased naving been admitted to the hospital severely burned about the body, arms and thighs, and of her death from the effect of the injuries.

injuries

Dr. Uhl was sworn and testified that he examined the passage, and corroborated the testimony of previous witnesses in regard to the dimensions of the place. He gave a concennatory cois ion of the passage through which the "ballet girls" had to pass. The testimony here closed and the case was given to the jury, who rendered the following verdict "that deceased came to her death from burns received at the Hipprodrome, in consequence of her dress taking dire. Further, we believe that such burns were the result of the carless and improper manner of lighting an underground passage at sail place."

THE BALTIMORE FIREMEN.

Yesterday the above company proceeded on an excursion to visit Rightnings. Bandail's I-land, and other clanes of note up to on. They left their quarters at Gunter's Hotel, in Futton street, about the o'clock A M., in three stays belonging to Kipp & Brown, one of a large size and a so others of a smaller size and a spent the day in a very agreeable manner. The Baltimore Columbian Company No. 9 is very ancient, having beat instituted in 1809 and numbers over three hundred members, consisting the fly of the methanics of the city. Their apparatus is composed of two large engines, two suction engines, and two hose carts, caired by them red: Their engine house is situated at the corner of Broadway and Canton avanue. In Baltimore, the fact of being a freman does not exempt the member of an engine company from militia, jury, or other duties, nor is there any regular pay. Now and then an appropriation is made by the corporation for that purpose, but not to any large amount. Mr Davis who accompanies the company to our city, is only president protem.—the right president. Mr Colton, was not able to come on account of his duties, being emeloyed as begage master on the Philadel phis and Washington Baltroat. The Fire departments of Baltimere consists of about twenty two companies.

It is proper that it should be knewn that, in order to at ford ample scope for the inventive talent and skill of emocountrymen in machinery and agricultural implements, we have increased the size of the building by adding nearly one fourth to its area, beyond what was originally contemplated to that we have now for the purcoses of arbitions two hundred thousand aquare feet, or nearly five acres.

Not limiting their plans to a display merely curious or attractive, the Directors have organised a department of amineralogy and geology, in which some of the best scientifications of the country has been employed; and the foundation is thus laid of a most valuable national collection of the mineral recourses of the country.

The Directors had koped to open the Enthibition at an earlier period, but the novoity and intricacy of the style of construction and the high standard of architectural beauty which it has been the oldert of the Association to attain have produced delay, and it has been impracticable for the Directors. notwithstanding their utmost vigilance and their most carnest desire, to announce the opening at as earlier day.
